SIEM Hands-on using Splunk– Task 2

Intern Name: Aditi Gupta

Tool Used: Splunk(free trial)

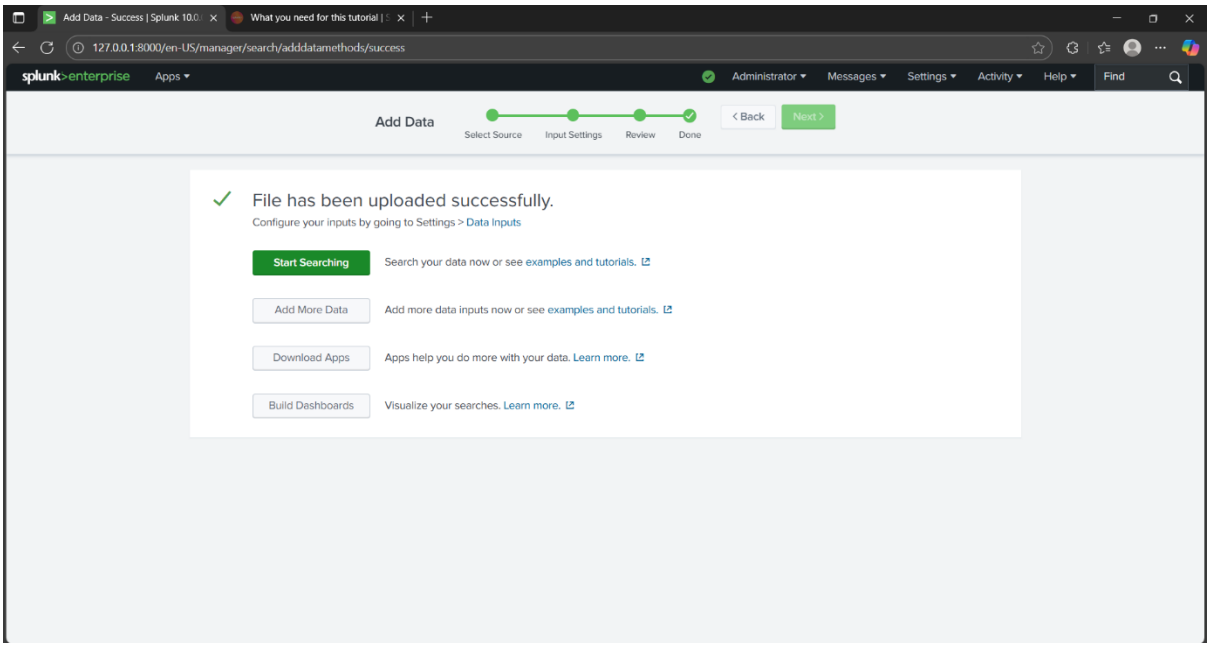
Date: 05/08/2025

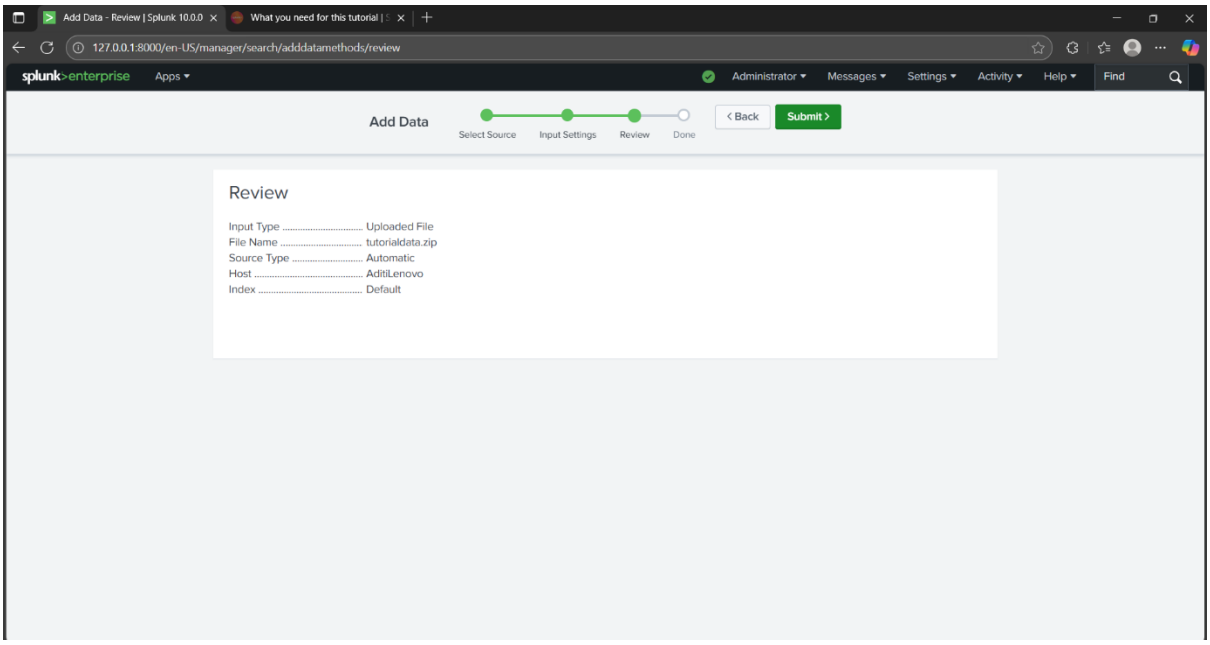
TASK 2!

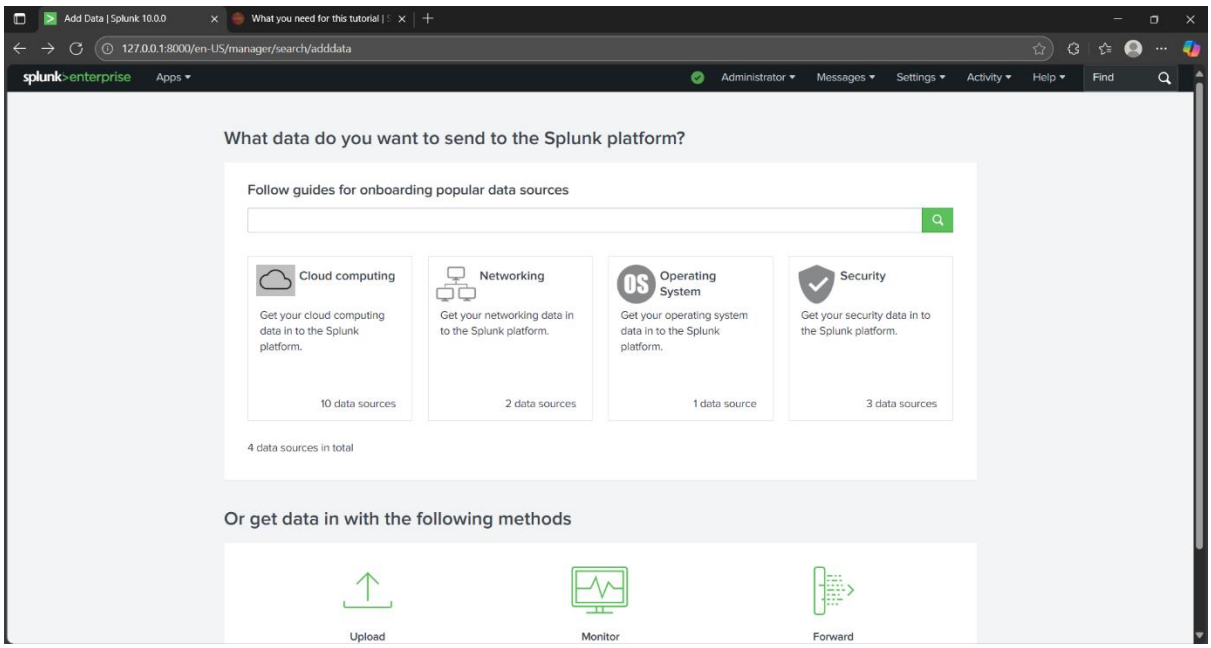
1. **What is Splunk?**
   Splunk is a SIEM (Security Information and Event Management) tool that collects and analyzes machine-generated data to help identify security threats and monitor system behavior.
2. **Objective of Task:**
   To gain hands-on experience with Splunk by uploading logs and performing searches to monitor and analyze events.
3. **Steps Performed:**
   - Installed & logged into Splunk
   - Uploaded sample log files from system
   - Performed basic searches like:
     - failed
     - error
     - login
   - Explored dashboards and search results

4. **Screenshots:**

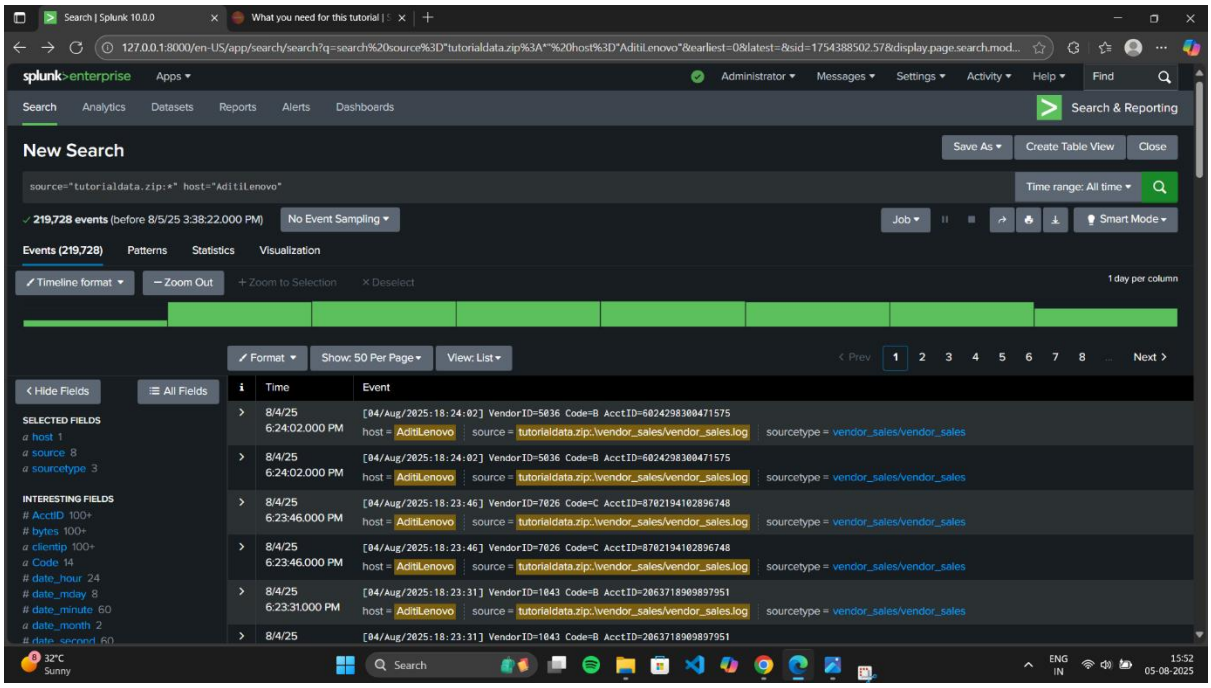
- Uploading the document



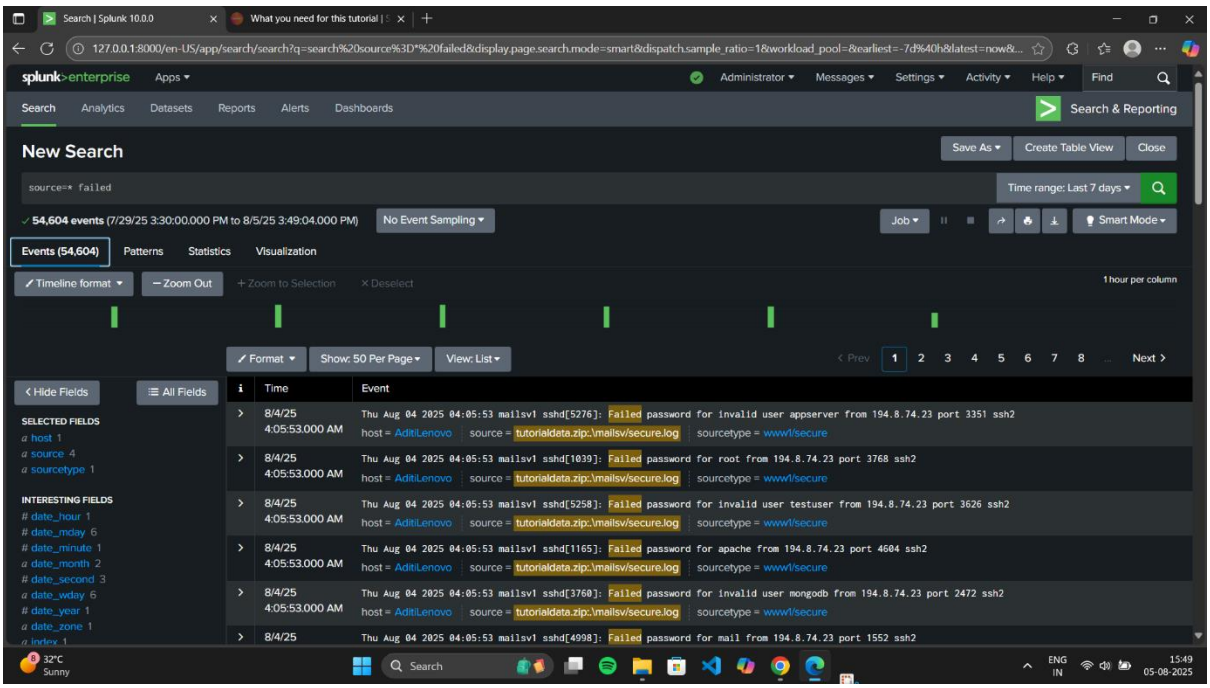




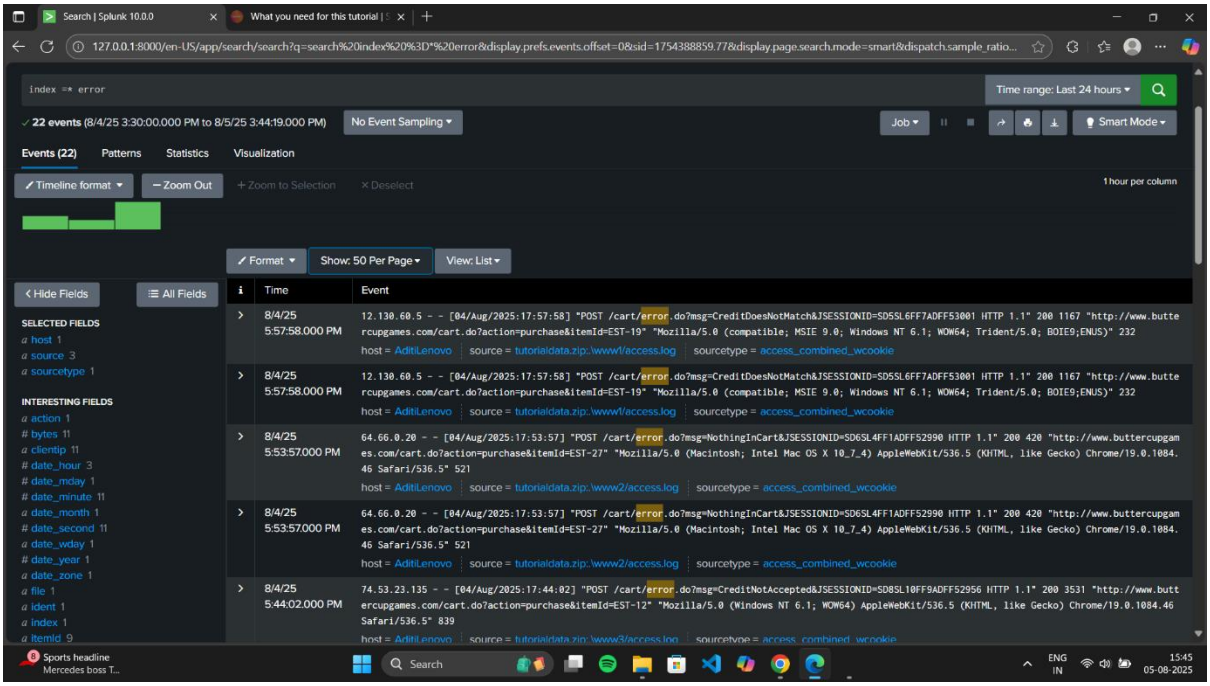
- Login



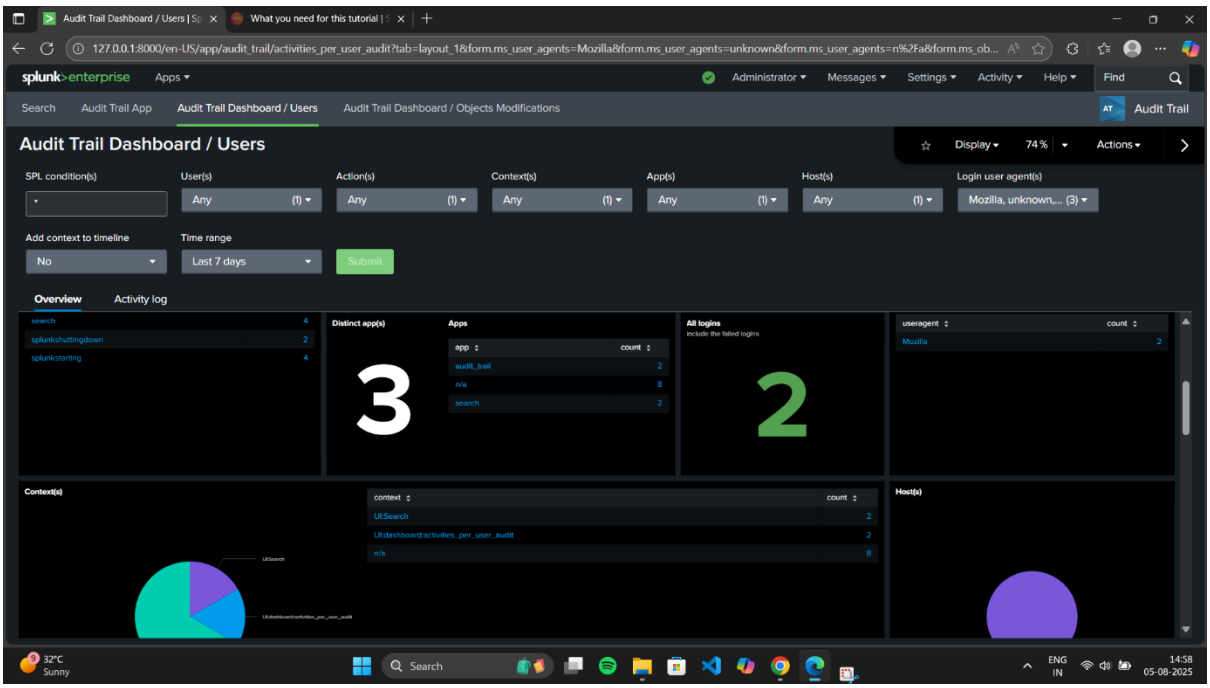
- Failed login

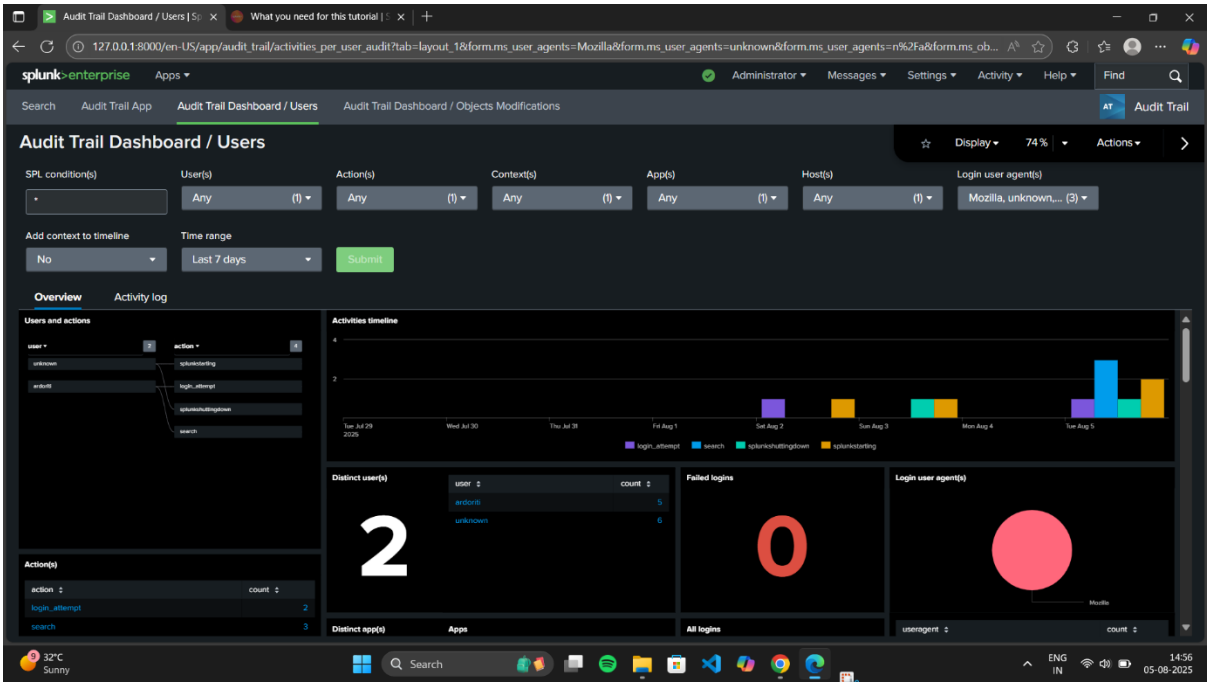


- Error



- Dashboard





5. **Conclusion:**
   This hands-on provided basic understanding of SIEM tools, especially Splunk, and how they help analyze and visualize log data to detect abnormal or suspicious activities.
